

IDA

CARNERA

Architect & Urban Designer
ic@arkilab.dk / +45 29613801

- ✓ Citizen Engagement Strategies
- ✓ Human-centered design
- ✓ Urban Vision Strategies
- ✓ Social and Cultural Planning
- ✓ Co-design and Community Engagement

“Ida’s educational background in both architecture, urbanism and political science enables her to have a holistic approach to urban design processes, and to understand the different aspects within the dynamic conditions of contemporary society. Ida is passionate about challenging the way architecture normally is practiced and placing people at the center, to ensure good and democratic urban development that nurture social life and community. Ida has professional experience within both research and planning within the field of human centered design at GXN and Gehl architects. At arki_lab, Ida uses her strong analytical skills to improve the built environment based on citizen involvement ideas as well as planning, preparing and developing reports and strategies.

At arki_lab, Ida is involved in concept development and planning, as well as preparing reports, strategies and design based on citizen involvement ideas. She is also responsible for developing our engagement tools such as arki_nopoly and ArkiCity.

CO-DESIGNING A MASTERPLAN FOR ABORIGINAL ELDERS

Sydney, Australia – 2022

arki_lab is designing a masterplan for the future IYORIA Retirement and Age care estate for Aboriginal Elders at the Sydney Olympic park area in Sydney. In spring 2022 arki_lab ran a workshop to get the Elders' inputs on challenges, wishes and ideas for the project.

VISIONS FOR FUTURE WORK SPACES IN VESTERGADE 8

Copenhagen, Denmark – 2022

Based on an involvement process with DIS faculty and staff participants, arki_lab is working on a transformation of the interior design in Vestergade 8 in central Copenhagen. arki_lab is assisting DIS with both communication, vision drawings, concept and implementation.

FREDERIKSSUND COASTAL PROTECTION

Frederikssund, Denmark – 2022

Together with the City of Frederikssund, arki_lab facilitated an idea process with the purpose of gather ideas from citizens on how a coastal protection project can contribute positively with new recreational qualities to urban life. The process also sought to create ownership and awareness among the citizens.

CLIMATE ADAPTATION OF VESTBYEN, AALBORG

Aalborg, Denmark – 2022

The project 'Bådparken' (by arki_lab, C.F. Møller, Deltares, Raw Mobility, EKJ Rådgivende Ingeniører) won first prize in the architectural competition of developing Aalborg Vestby. Bådparken is both about climate adaptation and about creating an attractive fjord and park life that connects the water with the city and supports the area's identity.

A NEW YOUTH CULTURE HOUSE AT FILMTORVET

Holbæk, Denmark – 2022

Together with Sidesporet, UngHolbæk and Statens Kunstfond, we facilitated a design process of a new youth culture house with young people in Holbæk. The project consisted of idea development, co-design and transformation of four containers into the physical environment that the young people themselves had wanted.

COMPETITION PROGRAM FOR CAMPUS ODSHERRED

Asnæs, Denmark – 2022

For Nordvestsjælland's Erhvervs- og Gymnasialeuddannelser, arki_lab produced a competition program for the upcoming architectural competition for the new Campus Odsherred – a gathering point for youth education throughout Odsherred Municipality. The project includes both renovation, new construction and landscape.

USER INSIGHTS REGARDING MALMÖ TERMINALS

Malmö, Sweden – 2021

In collaboration with the City of Malmö and Trafikselskabet Skånetrafiken, who are working towards a more sustainable transport sector, we carried out a large analysis among the users of six of Malmö's central stations. The project gave insight into new methods for dialogue with the town's citizens.

DEVELOPMENT STRATEGY PLANS FOR VIG AND ASNÆS

Vig and Asnæs, Denmark – 2021

In collaboration with the citizens and various public and private stakeholders, arki_lab has developed guidelines and strategy frameworks for the future development of both the city of Vig and Asnæs.

BYENS HUS DESIGN

Gentofte, Denmark – 2021

In the work to realize arki_lab's master plan for Byens Hus, we assisted Gentofte Municipality and the association Byens Hus with further design and concept development as well as projecting of sub-projects in the building.

VISIONS FOR CAMPUS ODSHERRED

Asnæs, Denmark – 2021

In collaboration with Odsherred Municipality, OG and EUC Nordvestsjælland, arki_lab ran an extensive series of engagement workshops, focus groups and interviews in order to start a conversation of the future development of Campus Odsherred. The visions of the local citizens are materialised through this report.
